- Machine Learning
- Python Development
- Website Development
- Frontend Development
- Project Management
- Effective Communication
- Critical Thinking

LANGUAGES

- English (Basic)
- Urdu (Fluent)

PROFILE

I'm Hamid Ali Awan, a BS Software Engineering student with a passion for building intelligent, scalable Websites and Machine Learning Models. My academic foundation in computing fuels my ability to design clean architectures and develop production-ready Websites..

WORK EXPERIENCE

Sarhad University Peshawar

2026 - PRESENT

Machine Learning Engineer

- Develop, implement, and deploy machine learning models that align with business requirements and objectives.
- Design, train, evaluate, and optimize machine learning models using appropriate algorithms, datasets, and performance metrics.

CodeAlpha

2025 - 2026

Machine Learning Engineer

- Assist in developing and implementing machine learning models for real-world projects and business requirements.
- Support data collection, preprocessing, model training, testing, and evaluation using Python and machine learning libraries.
- Monitor model performance, analyze results, and contribute to improving the accuracy and reliability of machine learning solutions.

Sarhad University Peshawar

2022 - 2024

Frontend Developer (React)

- Assist in developing responsive and user-friendly web interfaces using HTML, CSS, JavaScript, and React.js.
- Build and maintain reusable React components while integrating APIs and implementing interactive features.
- Test, debug, and optimize web applications to improve performance, usability, and cross-browser compatibility.
